## What is claimed is:

- 1 1. An adjustable bed comprising:
- 2 a bed section;
- 3 a tilt unit operable to performan operation of tilting
- 4 the bed section laterally;
- a judgment unit operable to judge which sleep stage
- 6 a person who is lying on the bed section is in; and
- 7 a control unit operable to control the tilt unit based
- 8 on a result of the judgment by the judgment unit.
- 1 2. The adjustable bed of Claim 1,
- wherein the judgment unit judges whether the person
- 3 is in REM sleep or not, and
- 4 the control unit has the tilt unit perform the tilt
- 5 operation, if the judgment unit judges that the person
- 6 is in REM sleep.
- 1 3. The adjustable bed of Claim 1,
- wherein the judgment unit judges a depth of sleep
- 3 of the person, and
- 4 the control unit has the tilt unit perform the tilt
- 5 operation, if the judgment unit judges that the depth of
- 6 sleep is substantially great where the person is in slow
- 7 wave sleep.

- 1 4. The adjustable bed of Claim 2,
- wherein the judgment unit judges a depth of sleep
- 3 of the person, and
- the control unit has the tilt unit perform the tilt
- 5 operation, if the judgment unit judges that the depth of
- 6 sleep is substantially great where the person is in slow
- 7 wave sleep.
- 1 5. The adjustable bed of Claim 1,
- wherein the control unit prohibits the tilt unit from
- 3 performing the tilt operation within a predetermined time
- 4 period from completion of an immediately preceding tilt
- 5 operation, irrespective of which sleep stage the person
- 6 is in.
- 1 6. The adjustable bed of Claim 2,
- wherein the control unit prohibits the tilt unit from
- 3 performing the tilt operation within a predetermined time
- 4 period from completion of an immediately preceding tilt
- 5 operation, irrespective of which sleep stage the person
- 6 is in.
- 1 7. The adjustable bed of Claim 3,
- wherein the control unit prohibits the tilt unit from
- 3 performing the tilt operation within a predetermined time

- 4 period from completion of an immediately preceding tilt
- 5 operation, irrespective of which sleep stage the person
- 6 is in.
- 1 8. The adjustable bed of Claim 4,
- wherein the control unit prohibits the tilt unit from
- 3 performing the tilt operation within a predetermined time
- 4 period from completion of an immediately preceding tilt
- 5 operation, irrespective of which sleep stage the person
- 6 is in.
